

UNILEVER'S POSITION ON THE USE OF GENETIC ENGINEERING AND CLONING IN FARM ANIMALS

Unilever has a policy not to use foods or food ingredients derived from genetically engineered or cloned animals or their offspring in its products. This position applies to all species, products and geographies.

UNILEVER'S POSITION

We are committed to conducting our operations with integrity and to putting consumer needs and choice at the heart of all of our activities. In our use of scientific innovation to meet consumer needs, we respect the concerns of our consumers and of society.
